

GNFT

Gynaika Non-fungible token

GNFTs are the fundamental elements in the game Gynaika. It serves as a ticket for both PKZ and PKP mode, making it accessible to a limited number of players.

Players must obtain the GNFT to unlock the PKZ mode and the PKP mode of the Gynaika game. Once the user owns the GNFT in their DEX wallet, players can fully obtain the play and earn the gynaika game.

Gynaika will support standard integrations into the wallets commonly used on the Binance smart chain. Example: once a user purchases the GNFT or owns the GNFT in their metamask or Trustwallet and connects it to their Gynaika account, the user can then access the PKZ mode and the PKP mode.

In Gynaika, users have total control of their in-game assets. Assets gotten while playing the campaign mode can be monetized.
